

THINK ORANGE TO STAY GREEN

INTRODUCING THE NEW
HYBRID H340AJ

PRODUCT INTRODUCTION: H340AJ

The H340AJ is the first true 'series' hybrid with direct electric drive in the industry. Equipped with dual drive (AC direct electric and a small diesel engine). Lower noise and similar in performance compared to a diesel driven lift -it has excellent rough terrain ability-, the H340AJ can run in environmentally sensitive areas as well as outside, increasing your utilisation rate.

Environmentally Friendly

A smaller diesel engine with direct electric drive means less fuel consumption, less noise and less environmental impact.

Power and Performance

Four individually controlled drive motors provide four-wheel drive and an exceptional terrainability on par with its diesel counterpart.

More Access, Greater Strength

The articulating jib puts you in those hard-to-reach places while steel hoods provide added durability.

Key Specs

Platform Height:	10.31 m
Platform Capacity:	230 kg
Horizontal Reach:	6.06 m
Stowed Height:	2 m
Stowed Width:	1.93 m
